```
interface Car {
    void accelerate ();
    String getColor ();
    double getSpeed ();
}
class Bmw implements Car {
    @Override
    public void accelerate () {
        System.out.println("accelerate Bmw");
    }
    @Override
    public String getColor () {
        return "red";
    }
```

Date . . . No

```
    @ Override
    public double getSpeed(){
        return 200.0;
    }

    public String toString(){
        return "Bmw" + getColor() + getSpeed();
    }
}

class Civic implements Car {
    @ Override
    public void accelerate (){
        System.out.println(" accelerate Civic");
    @ Override
    public String getColor (){
        return "yellow";
    @ Override
    public double getSpeed(){
        return 250.0;
    }
    public String toString(){
        return "Civic" + getColor() + getSpeed();
    }
}

class Main {
    public static void main (String [] args){
        Bmw b1 = new Bmw();
        Civic c1 = new Civic();
        b1.accelerate(), b1.toString();
        c1.accelerate(), c1.toString();
} }
```
