```
interface Shape {
    void draw (String color);
}
class Rectangle implements Shape {
    @Override
    public void draw (String color) {
        System.out.println (" draw HCN bằng " + color);
    }
}
class Circle implements Shape {
    @Override
    public void draw (String color) {
        System.out.println (" draw HT bằng " + color);
    }
}
class Main {
    public static void main (String [] args) {
        Rectangle r1 = new Rectangle ();
        Circle c1 = new Circle ();
        r1.draw (red);
        c1.draw (yellow);
    }
}
```
